CASSA MOBILE

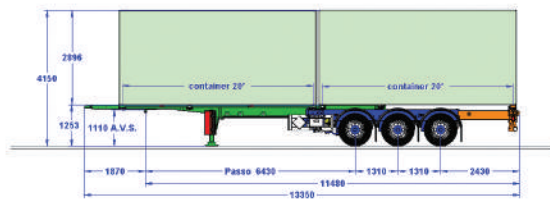

## CARATTERISTICHE

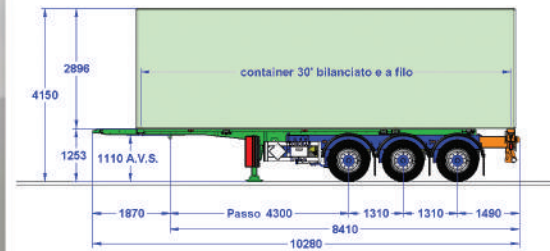

Telaio telescopico per trasporto container e casse mobili di tipo unificato. Il Galileo racchiude tutte le combinazioni possibili per il trasporto container in un unico veicolo. Principale punto di forza sta nell'estrema semplicità e rapidità nel passaggio da una configurazione all'altra. Disponibile nella versione standard o a collo d'oca.

Curato nella struttura per dare il giusto bilanciamento tra resistenza, stabilità, durata e peso. Di serie si fornisce la dotazione ADR di base, da completare in base alle specifiche necessità.
